

# ***Dome Tent Erection Guide***

- 1) Lay out tent on ground ensuring correct orientation***
- 2) Peg four corners after tensioning groundsheet***
- 3) Connect spring steel tent poles together***
- 4) Lay two poles diagonally over tent (ie corner to corner)***
- 5) Tie apex of tent to pole cross-over point***
- 6) Loosely tie flysheet to apex of tent as well***
- 7) Lift tent and poles into upright position and secure poles at base of four corners (easier if one person stands in open doorway of tent)***
- 8) Secure tent to poles along seams using clips fitted***
- 10) Tension flysheet with guy ropes and straight poles(longer) provided***
- 11) Tension window awnings with guy ropes and straight poles (shorter) provided***
- 12)Secure base of tent to ground with pegs***
